

Activity Guide – Unplugged Neural Networks

Round 1: Limited Context Prediction

Take turns adding **one word based only on the last three words**.

- Neuron 1:** Look at the starting prompt and write one word in your column to continue the sentence. Then, fold the paper back so the first word in the starting prompt is hidden and pass the paper to Neuron 2.
- Neuron 2–5:** Look at the three previous three words and write one word in your column to continue the sentence. Then, fold the paper back so that only the word you added and the two before it are visible and pass the paper to the next Neuron.

Starting prompt			Neuron 1	Neuron 2	Neuron 3	Neuron 4	Neuron 5
Space	travel	is					

Round 2: More Context Available

Take turns adding **one word based on the full starting prompt**.

- Look at the starting prompt and the words added to the sentence by previous Neurons and **write one word** in your box to continue the sentence and pass the paper to the next Neuron.

Starting Prompt	<i>The exhausted student left school to go home to</i>
Neuron 1	
Neuron 2	
Neuron 3	
Neuron 4	
Neuron 5
