

Activity Guide - Examining AI Contradictions

Examine AI Contradictions

- Review both of the chats below between a person and an AI-powered virtual doctor.

Chat 1

Virtual Doctor

Hi, I've been having chest pain and shortness of breath. Should I go to the hospital?

Chest pain is often caused by stress or indigestion. Try drinking water and taking deep breaths.

But what if it's something serious?

Many people experience chest pain due to minor issues. If it gets worse, consider speaking with a doctor later.

Should I take any medication?

Over-the-counter antacids might help. If the pain continues for several days, book an online consultation.

Chat 2

Virtual Doctor

Hi, I've been having chest pain and shortness of breath. Should I go to the hospital?

Chest pain and shortness of breath could indicate a severe condition. Seek emergency medical care immediately.

Could it be something less serious?

These symptoms are often associated with life-threatening conditions. It is important not to ignore them.

What if I've had these symptoms before and it wasn't serious?

Any occurrence of chest pain should be treated as an emergency. Contact emergency services or visit a hospital now.

Why This Might Have Happened	
Potential Real-World Consequence	

3. Fact-check claims made by the AI by doing a Google search or using one of the following sources.

- <https://my.clevelandclinic.org/health/symptoms/21209-chest-pain>
- <https://www.mayoclinic.org/diseases-conditions/chest-pain/symptoms-causes/syc-20370838>
- <https://medlineplus.gov/ency/article/003079.htm>

- Imagine you wanted to provide an AI-powered doctor with more context. Refine the initial prompt to include information you found during your fact-checking research.

For example: *I'm having chest pain and it started after baseball practice. I found that this can be caused by a muscle strain. Should I go to the doctor?*

Uncovering Contradictions with AI Chat

As you complete Levels 3–5, answer the reflection questions below:

What contradictory response(s) did you notice?

How does the way we frame our prompt change AI's predictions?

How can we refine the prompt to ensure clearer, more consistent answers?
